

The Magic of Transformation. I was born in Chile and currently lives and works between Chile, the United States and Germany. I am an Interdisciplinary Artist with an extensive experience in environmental issues of the Ocean and Territories. My work explores the connections and relationships between Humanity and Nature creating Art Installations & Films that display and present their symmetries, closeness and proximities. By combining several Media and a direct contact with the Space, I aim at an awakening and experimentation with each of the senses. I also specialize in Breathwork and Sonic Sessions as a facilitator through Aromatherapy activations sharing my Spiritual believes.

Based on scientific data, the main core of each project highlights the continuing triple crisis: warming, climate change and biodiversity loss, serious issues facing the planet. Offering solutions through a shift in awareness. Activating Sound Sessions; the Art of Expanding Consciousness through Resonance.

Each new proposal stimulates perception through the senses: beyond their visual features, they address the body of the person involved, stimulating smell, touch, and hearing in particular. Sound is an increasingly relevant aspect in the creation, a language that is appearing with greater emphasis due to its ability to generate vibrations that can positively stimulate brain waves.

I first think of myself as Nature, as part of an order that exceeds me, entering extreme landscapes and letting myself be affected and transformed by them. If Nature is sick, I get sick with it. If Nature burns, I burn with it.

Through decades with Patricio, an Interdisciplinary Artist as well and my husband, we are researching and describing Nature as a majestic Universal Symphony through a Sound Journey across the element of water, where everything is unified, a continuous circle, amplified sound, resonating water, resonating plate, liquid resonating machine, an altar of connection, a portal that takes us back to our own human body machine. A universal meditation space. Harmony, intention, measurement, calibration, balance, union and above all LOVE for the origin and creation. No water, no life.

The call is deepening the notion on how severe the environmental crisis in which we find ourselves today is. With Patricio we are creating a "Living Nest" through Sound Healing, portraying it through a combination of films, photography, sound landscapes, performances, drawing, writing and developing a sacred space of the personal self-care process.

The sound emitted by the vibration of the human voice elevates states of consciousness. In a sound environment, silence is crucial: pausing and holding our breath informs the living system with sustainable rhythms. The planet's history shows that nothing ends, but rather everything is transformed. The purpose is to present this transformation and create spaces based on cooperation. Collaboration and synergy is where everything becomes connected. Going beyond that blind spot and take us to another dimension.

We are a NETWORK weaving our energetic thoughts. A NETWORK of love. We are energy in constant transformation.

With the MAGIC of LOVETUNER we are traveling to the Universe, where our journey is empowered with experiences full of mysteries. With the treasure LOVETUNER, we are able to develop the history of the bodies that, together with the Resonance of the Universe, will be reflecting in vibration maps. Vibration brings information that evoke through a Universal Symphony, a sound journey that is presented at each in-person point or is heard with eyes closed, connecting to our own inner journey towards the origin of the Universe.

Each of my creative process is not merely rational discourse, it is THINKING WITH FEELING, a language that goes right through my body. My work is not meant to be understood, but to be EXPERIENCED. It is necessary for experience to nurture consciousness, otherwise words become meaningless. Our thinking and our reality can be modified as long as we have a transformative experience. It's life moving and pushing us, manifesting its urgencies.

The healing power of 528Hz frequency: LOVETUNER 528Hz frequency, Planet Earth 528Hz frequency, Sun 528Hz frequency.....LOVE is the TUNE-IN POWER.....

Each of the Sonic Sessions that are performed are unique since Intuition is the key and protagonist of the movement and action that is felt at that moment. The present time is what achieves this journey. At these sessions, the LOVETUNER is the pulse to enter another dimension from the deep combination of breath and sound, I can not live without this treasure. Simultaneously, between listening HADAL, an Oceanic music album that contains four soundscape compositions born from reflecting on the depths of the Ocean and despite everything, life exists and the 528Hz frequency of the LOVETUNER is where each BEING levitates within itself.

Breath control is the only thing that allows buoyancy and from breathing arises my concern for exploring extreme places where the body has and will always have to adapt. Adaptation is the basis for avoiding extinction. I want to share this beauty with people and affect them in order to raise awareness and a sensitivity based on the awe for the unknown, making it known and protecting it. To create collective awareness in order to act with conviction in the face of the necessary protection of each creature, both endemic and global, making underwater flora, algae forests, plant gardens and the countless life forms that bear the fruit that provides most of the oxygen we breathe, a great treasure for all humanity.

Ridges, Ring of Fire, Volcanoes, Pulse, Submarine Canyons, Water Masses, Currents, Upwelling, Food Web, Trenches, Basins, Subduction, Slope, Nutrients, Bathymetries...Knowledge is the path for protection.

Everything that is above is also below, and everything that is below is also above. Like the ridges, the canyons, the masses of water, the trenches, the currents and upwellings below, so the winds and storms above, the temperatures, the depths, the cliffs... and many more phenomena: a rational sensation of a perfect natural puzzle. To feel, to experience, to discover, to dream, to relate, to love...

Recover - Care - Preserve - Contemplate - Respect - Explore...

Thank you for feeling and trying to understand that we are ONE and in collective collaboration we can respect each other without doing harm. TIME does not stop and we just need to contemplate the ocean that provides most of the oxygen we breathe.

Thank you for having this experience.

Immensity, waves and the movement of water between the depths, is where the song of the Blue Whale appears, whose Chilean dialect is different from that of the species in other parts of the world, a unique acoustic in Chile where each pulse, each rhythm is a beautiful mystery. Songs of love, of communication, of socialization, a search for food and above all, a sense of identity. Listening to the largest animal and mammal on the planet, whose presence is essential for the ocean's health, its frequencies heal the soul. A blue planet where the synergy of nature and the symbiosis between species provide life. Through their songs, imagine their physical presence and the LOVE frequency as you listen to their sounds and travel to another dimension.

With gratitude, hope and all my LOVE
